## ***The Legacy Continues...***

Chinook has been one of the top names in motorhomes since its debut as Mair & Son, Inc. back in 1938. However, it was not until the early 1950s that mass produced motorhomes started hitting the road, only proving that Chinook RV has consistently been an innovative leader in the motorhome industry, which stayed true throughout the years and again with the 1966 Chinook 1400. With the incorporation of fiberglass, Chinook was able to be one of the first companies to create a sleek and aerodynamic design; making Chinook one of the most sought after brands. Due to Chinook's success with the 1400, they began to further their use of fiberglass throughout the overall construction process.

Today, Chinook has united the historic signature quality of Chinook with 21st century technology. Built on the Mercedes Benz Sprinter chassis, Chinook B Vans redefine opulence by making luxury features standard. Each motorcoach combines innovative, eco-friendly, BlueTEC technology and safety with Mercedes Benz style, world-class

performance, and unparalleled design. Chinook is now placing its quality stamp on the towable market through acquisition of Riverside Travel Trailers in Fall 2018. RPM toy haulers are the most rugged and durable products in its class and DREAM travel trailers are the quality alternative to the entry level towable market.

In March 2019, Chinook debuted the Trail Wagon, a fully bonded automotive style constructed toy hauler that combines the amenities of a luxurious Trail Suite for friends and family with the ability to haul your family fun off-road vehicles and cargo.

We know the kind of freedom and adventure you are looking for and are proud to bring the renown Chinook brands back to life. At Chinook RV, we value the opportunity to build a long term relationship with our customers, and we do so by exceeding your expectations.
