The sports car of motorhomes

CHINOOK RV

The Sports Car of Motorhomes

The Summit is distinctively handcrafted for quality and style. It offers a special parking spot by the creek, away from the crowds, in the mountains, providing access to places larger motorhomes can't reach. It's nimble enough for city streets, but we suggest the mountain creek for a unique experience.

Chassis Standards

- Mercedes-Benz Sprinter w/ 4-Cyl Twin-Turbo Diesel Engine
- 9 Speed Transmission
- Navigation
- Driver Convenience package
- Safety features including collision warning, lane keeping system & side-wind stabilization.

Truma Aventa

Enjoy pure, cool, quiet comfort with Truma Aventa comfort: an efficient, near-silent rooftop air conditioner. Keep your RV comfortable even in high heat and humidity with low-amp draw for off-grid efficiency.

- 120-volt AC power
- 13,500 BTU/h cooling capacity
- Specialty modes: automatic cooling, air circulation, dehumidification & night mode
- Standard wireless remote control
- Ergonomically designed air distributor with multi-directional air adjustments

About Us

Chinook RV has a rich history dating back to 1938 when it Started as Mair & Son, Inc. In the 1950s, they became known for building high quality motorhomes, establishing themselves as industry innovators. Their innovation led the effort to establish cutting-edge fiberglass technology and became one of the most sought-after brands in the market.

Expanding on their fiberglass construction, Chinook unveiled the world's first one-piece, all-fiberglass shell for their motorhomes in the early 1970's. Despite economic challenges and fuel crises in the following years, Chinook remained resilient under the leadership of Gary Lukehart. They shifted focus to Class B and B+ style motorhomes, producing them in California and Washington state. Throughout the 80s, 90s, and early 2000s, Chinook continued to produce exceptional models, winning accolades, and admiration. However, the Great Recession led to the temporary halt of production in and the closure of Chinook RV.

In 2013, Phil Rizzio acquired Chinook RV, vowing to uphold its original values and prioritize quality over quantity. Under new leadership, Chinook sought a new manufacturing location, initially partnering with Country Coach in Oregon. However, due to unforeseen circumstances, they had to find a new space.

In 2019, Chinook seized an opportunity to acquire facilities in Indiana, investing in over 20 acres of property and two massive manufacturing buildings. Despite setbacks due to the pandemic, they worked diligently to bring the facilities up to standard. In March 2021, Chinook proudly introduced the all-new Summit B+ and the Bayside Class B conversion van. Followed by the Maverick B+ in 2022. The production lines were established for each model, ensuring high-quality motorhomes. To continue leading innovation, Chinook partnered with Expion 360 to design all-electric lithium battery-powered motorhomes called the 360 units, including the Summit 360, Maverick 360, and Bayside 360.

Today, Chinook RV continues its legacy of resilience, innovation, and a commitment to excellence. They stand as a testament to adventure and luxury in the motorhome industry, offering extraordinary experiences for wanderers seeking top-tier vehicles.
